## Sublimation Earrings

Follow the steps below to make your own earrings!  
This is a beginner-friend activity.

### Supplies:

- Sublimation earring blanks
- Sublimation paper
- Teflon + heat resistant tape + scissors + heat press + gloves
- Earring findings, jump rings pliers

### Step 1: Preparing the image

#### Sublimation Printer tutorials

#### Designing links

- Coming Soon!

#### Templates

- Sublimation Garden Flag (8.5" x 11.0" in Canva)
- Sublimation Tile (4.0" x 4.0" in Canva)

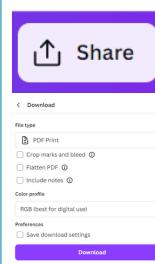

Go to Makerspace website. Locate Sublimation earring file.

Create account in Canva or sign in.

Make a copy of the Canva file. Rename it.

Add an abstract picture to your canvas. Duplicate it.

### Step 2: Design and Print

In Canva, click Share. Then, click Download → PNG → Download.

Open up Sawgrass Utility. Create a new job and open your PNG. Change repeating to 2 and material to MDF.

Using heat resistant tape, tape all sides of earring blank. We will print and heat press your earrings together (370 degrees for 70 seconds).

### Step 3: Assemble

Using pliers place 2 jump rings to attach earring hook to sublimated earring.

Put completed earrings on a card to create your one-of-a-kind earrings. Share your project at #CpplMakes
