

Follow the steps below to make your own water soaker!
This is a beginner-friendly activity for ages 8-18.

Supplies:

- 1 spray bottle insert
- 1 plastic bottle
- Rubber band + hot glue
- Foam cover + cutting tools

Step 1: Prepare bottle

Make a hole in the side of the bottle about fingernail size.

Insert the end of the spray bottle into the hole. Cover with hot glue.

Step 2: Glue sprayer

Cut a rubber band in half. Glue to bottle cap & opposite side of hole.

Glue spray bottle top to underside of rubber band.

Step 3: Add final touches

Cut foam lengthwise. Glue around bottle. decorate the bottle.

Open bottle cap. Fill with water.

Spray outdoors and enjoy!
